

i4M Tablet Requirements

Version 2 i4M Systems (from June 2021 Production)

Android Device
Screen Size : 10"
Operating System : Android version 8 and above
Minimum Storage : 32 GB
3/4G Sim Card*
Preferred Brand : Samsung

Compatible i4M Apps :
Spreader Controller, Tracer GPS, TracerMap, Seed Drill Controller, Depth Command

Version 1 i4M Systems (from 2018 to mid 2021 Production)

Apple Device
Screen Size : 8-12"
Operating System : iOS14 and above
Minimum Storage : 32 GB
3/4G Sim Card*
Preferred Device : iPad Gen 6 and above

Compatible i4M Apps :
Spreader Controller, RS232 Controller

** Sim Card is only required when downloading prescription map data from the i4M server away from the office in the field. Alternatively, maps can be downloaded at the office via Wi-Fi and stored on the device for use in the field. It is however recommended that the tablet has 3/4G LTE functionality to enable GPS location services. Some Wi-Fi only tablets do not have an internal GPS which makes them incompatible with all i4M apps.*
